# ABOUT US

NITRAMAX is founded in the year of 2017 by Ms. Parul Joshi to deliver the best qualitative water purification products to the end consumers. NITRAMAX strongly believes in healthy India & to make it possible the company is continuously doing innovations and manufacture the water purification products with latest technology. Our R&D team put their efforts in inventing the best one for the customers and that's the reason NITRAMAX becomes most trustable brand in water purification industry within a short period of time. We do manufacturing of innovative water purification products and trading products of some of the well-known brands as well. We provide end to end water purification solution to industries, domestic & commercial customer segment. Our Brand gained popularity in very short time in terms of quality, availability, quick delivery and after sales services

# MISSION

Our mission is to provide supreme quality in the industry of water purification with magnificent accuracy and quick delivery. The industries and companies will meet their needs for the pure water.

# VISION

NITRAMAX believes that everyone has a right to drink pure and clean water. Our vision is to constantly innovate and improve upon ourselves to deliver reliable innovative products that would remain the gold-standard in the water purification industry. We want to deliver the complete product that gives the prominent experience to the end user and industry level person. We also want to maintain the competitive advantage of our stakeholders by maximizing the product quality in the water purification industry.

**WE DELIVER THE BEST  
INDUSTRY | COMMERCIAL | DOMESTIC**

# DOMESTIC RO PLANT

## Specifications

1. Wall Mounted
2. RO Water Purifier
3. Alkaline Water Purifier
4. Copper Purifier
5. B12 + UV Purifier
6. Under Sink Water Purifier

The domestic water purifier is designed to fulfill smaller usage of drinking water at homes and offices. Which Filtration capacity is 12 ltr to 15ltr per hour.

## APPLICATIONS

- |               |                      |
|---------------|----------------------|
| 1. Home       | 3. Cafeterias        |
| 2. Corporates | 4. Small Restaurants |

# COMMERCIAL RO PLANT

## Specifications

1. Wall Mounted
2. Pre Filtration
3. RO Membrane
4. RO Booster Pump
5. Solenoid Valve
6. Low & High Pressure Protection
7. Auto Flushing
8. TDS Rejection :  $97 \pm 2\%$
9. Capacity : 25 LPH To 150 LPH

“

Commercial Ro plant is designed to fulfill requirements of drinking water for capacity of 25 to 150 people at one roof.

”

## APPLICATIONS

1. Corporates
2. Big Offices

3. Factories
4. Restaurants

5. Hospitals
6. Hotels

7. Mall
8. Primary Schools

# INDUSTRIAL RO PLANT

## Specifications

1. Customized design
2. Structure of RO Plant : SS202 & SS304
3. Pre-Filtration
4. Operations : Automatic
5. TDS Rejection :  $97 \pm 2 \%$
6. Capacity: 250 LPH to 10,000 LPH

Industrial RO plants are very effective in treating brackish, surface and ground water for both large and small flow applications. The list below includes a few instances of industries that use RO water.

## APPLICATIONS

- |                    |                      |                        |
|--------------------|----------------------|------------------------|
| 1. Food Industry   | 3. Chemical Industry | 5. Restaurant & Hotels |
| 2. Pharma Industry | 4. School & Colleges | 6. Construction Sites  |

# WATER SOFTENER

At residential and industrial applications water softener is very effective for removing hardness from borewell and ground water. Due to hard water many problems occur like hair falling, itchy skin, scaling in shower panel-faucets and pipeline.

## Specifications

1. Customized Design
2. FRP Vessels
3. Multiport Valves
4. Ion Exchange Resin
5. Capacity : Up To 10Lac Liter

## APPLICATIONS

1. Bungalows  
2. Hospitals

3. Restaurants  
4. Hotels

5. Schools  
6. Mall

7. Industries  
8. Constructions

# WATER COOLER

## PRODUCT FEATURES

1. Stainless steel body & Tank  
( SS202, SS304)
2. Model Range : 20L to 500L
3. Compressor: Emersion / Tecumseh
4. 100% copper refrigerant system
5. Inner Grouped copper tubing  
for better heat transfer
6. Eco Friendly
7. Heavy Duty Compressor with  
High Efficiency
8. No Rusting and No Corrosion
9. PUF Insulation
10. Faster cooling & Silent Operation
11. Customized Design
